

RESULTS OF CROSSROADS-CIVITAS POLLING ON THURSDAY, SEPTEMBER 22, 2016

Note: The polling done on Sept. 22 was about the process of polling rather than the results. The results may be interesting to talk about, but there are three reasons why they should not be considered reflective of public opinion at this time.

1. Our sample was small, only 42 respondents. A reliable poll requires at least 1,000.
2. 73% of our respondents were male; only 27% female. That is not a balance.
3. All of our polling was in downtown Clayton. That is not reflective of America.

But it was fun and thanks to everyone who participated.
