

List of government space agencies

This is a list of [government agencies](#) engaged in activities related to [outer space](#) and [space exploration](#). (There is also a [List of private spaceflight companies](#).) As of 2018, 72 different government space agencies are in existence; 14 of those have launch capability. Six government space agencies—the [China National Space Administration](#) (CNSA), the [European Space Agency](#) (ESA), the [Indian Space Research Organization](#) (ISRO), the [Japan Aerospace Exploration Agency](#) (JAXA), the [National Aeronautics and Space Administration](#) (NASA), and the [Russian Federal Space Agency](#) (RFSA or Roscosmos)—have full launch capabilities; these include the ability to launch and recover multiple satellites, deploy cryogenic rocket engines and operate extraterrestrial probes. The name given is the English version, with the native language version below. The acronym given is the most common acronym: this can either be the acronym of the English version (e.g. JAXA), or the acronym in the native language. Where there are multiple acronyms in common use, the English one is given first. The date of the founding of the space agency is the date of first operations where applicable. If the space agency is no longer running, then the date when it was terminated (i.e. the last day of operations) is given. A link to the Agency's primary website is also given.

List of space agencies

Chart on Wikipedia is color-coded.

Name	Initialisms /Acronym	Country	Founded	Terminated	Capabilities of the space agency			
					Astronauts	Operates Satellites	Sounding Rockets capable	Recoverable Biological Sounding Rockets capable
Air Force Space Command	AFSPC	 United States	15 September 1985	—	Yes	Yes	Yes	No
Australian Space Agency	ASA	 Australia	1st July 2018	—	No	Yes	No	No
Belarus Space Agency	BSA	 Belarus	2010	—	No	No	Yes	No
Central American Association for Aeronautics and Space <small>(Spanish: Asociación Centroamericana de Aeronáutica y el Espacio)</small>	ACAE	 Costa Rica	2010	—	No	Yes	No	No

Expected and proposed future space agencies

[\[edit\]](#)

Space agency		Country	Possible expected date of foundation	Current status	Ref(s)	
Name	Acronym					
Philippine Space Agency	PhilSA	 Philippines	—	Approved for creation in December 2018 under House Bill No. 8541. It will be attached to the Department of Science and Technology (DOST) and a Philippine Space Development Fund was created to fund its operation. 30 hectares of land has been allocated within the Clark Special Economic Zone in Pampanga and Tarlac as the official site of PhilSA.	[81] [82] [83]	
Sri Lanka Aeronautics and Space Agency	SLASA	 Sri Lanka	—	Immediate goal is to construct and launch two satellites. Sri Lankan Telecommunications Regulatory Commission has signed an agreement with Surrey Satellite Technology Ltd to get relevant help and resources.	[84] [85]	
African Space Agency	AfriSpace	African Union	—	Proposed in 2015	[86] [87] [88] [89]	
Pan-Arab Space Agency	PASA	 Arab League	—	Stalled. Proposed in 2009, at progress stage.	[90]	
South American Space Agency		 South America	—	Proposed in 2011, at progress stage	[91]	

Budgets

The annual budgets listed are the official budgets for national space agencies available in public domain. The budgets are not normalized to the expenses of space research in different countries, i.e. higher budget does not necessarily mean more activity or better performance in space exploration.^{[92][93]} Note also that budget could be used for different projects: e.g. GPS is maintained from the US defence budget, whereas ESA's money is used for developing the European Galileo positioning system. The data for authoritarian countries are unreliable. For European contributors to ESA, the national budgets shown include also their contributions to ESA.

Agency (country/region)	Budget (in millions of US \$)
NASA (USA)	19,500
CNSA (China)	11,000
ESA (Europe)	6,271
Roscosmos (Russia)	3,272
CNES (France)	2,600
DLR (Germany)	2,500
JAXA (Japan)	2,030
ASI (Italy)	1,800
ISRO (India)	1,500
UKSA (UK)	529
CSA (Canada)	488.7
KARI (South Korea)	366
ASA (Algeria)	360
AEB (Brazil)	259
SSAU (Ukraine)	250
CONAE (Argentina)	180
ISA and ISRC (Iran)	139
INTA (Spain)	135
NSO (Netherlands)	110
SNSA (Sweden)	100
SUPARCO (Pakistan)	45
SANSA (South Africa)	11.8
SSO (Switzerland)	10
AEM (Mexico)	8.34

Country/ region	Agency	Budget (in millions of US \$)	Year
United States	National Aeronautics and Space Administration	19,500	2017
esa	European Space Agency	6,271	2017
Russia	Russian Federal Space Agency	3,272	2015
France	French Space Agency	2,600	2017
Germany	German Aerospace Center	2,500	2015
Japan	Japan Aerospace Exploration Agency	2,030	2013
Italy	Italian Space Agency	1,800	2014
China	China National Space Administration	11,000 ^[102]	
India	Indian Space Research Organisation	1,700	2018-19
United Kingdom	UK Space Agency	529	
Canada	Canadian Space Agency	488.7	
South Korea	Korea Aerospace Research Institute	366	FY 2007
Algeria	Algerian Space Agency	360	2017
Brazil	Brazilian Space Agency	299	2015
Ukraine	State Space Agency of Ukraine	250	
Argentina	Comisión Nacional de Actividades Espaciales	180	2016
Iran	Iranian Space Agency and Iranian Space Research Center	139	2014-15
Spain	Instituto Nacional de Técnica Aeroespacial	135	2009
Netherlands	Netherlands Space Office	110	
Sweden	Swedish National Space Agency	100	2011
Pakistan	Space and Upper Atmosphere Research Commission	45	2018-19
South Africa	South African National Space Agency	11.8	2014-15
Switzerland	Swiss Space Office	10	
Mexico	Mexican Space Agency	8.34	
World	All space agencies (Total of listed budgets)	About 43,400
